A note from our CEO

IF I HAD TO SUM UP 2025 IN ONE WORD, IT WOULD BE *DEMAND*.

This year, our industry saw growing demand for bioethanol and its coproducts at home and abroad. We saw record demand for our input and expertise from leaders and policymakers at all levels of government. Across the country, we saw a rising demand for solutions that would strengthen the rural economy, bolster energy independence, and address affordability. And time and again, biofuels answered the call.

In 2025, American biofuels delivered for our nation, and Growth Energy delivered for American biofuels. We did it in three defining ways.

First, we delivered transformative advocacy.

Working with our members and our champion lawmakers, we helped shape cross-sector conversations and secured favorable policy outcomes through collaboration, education, and community. Whether on Capitol Hill, within federal agencies, in the courts, or at the plant, our collective efforts led to a remarkable string of major policy victories — from tax policy to E15 to global trade — and set the table for even greater wins ahead.

Second, we expanded the reach and impact of our unmatched expertise.

We produced pioneering research and delivered conversation-changing thought leadership that leveraged key insights and guided policy decisions. This work not only guided policymakers through complex debates, it cemented Growth's standing as the leading voice for the bioeconomy and a key contributor across the national and global energy landscape.

Third, we strengthened and expanded our markets.

We continued to accelerate biofuels adoption, grow demand, and secure market access both domestically and internationally. We built strategic partnerships with fuel retailers and opened new opportunities for deployment, reinforcing the market foundation our industry needs to thrive.

And throughout the year, we brought the industry together. Through top-tier events, insider briefings, and critical updates, we created a constant stream of opportunities for members to connect, collaborate, and build the relationships that drive our industry forward.

This year's annual report provides a deeper look at these three pillars of member value: policy influence, expert credibility, and market expansion. They are the drivers of our success as an organization and the foundation of our industry's remarkable progress. And they are the ways Growth Energy will help you meet growing demand — for both your product and for your perspective — that will continue to surge in 2026 and beyond.

Thank you for your support and engagement. 2025 was an exciting year. But together, we can make it a mere prelude to an even more promising future ahead. The workers, families, communities, and local economies that we are proud to represent deserve nothing less.

Emily Skor
CEO, Growth Energy

In 2025, demand defined our year — and biofuels delivered. Growth Energy answered the call with transformative advocacy, trusted expertise, and marketplace expansion.

TRANSFORMATIVE ADVOCACY

Shaping favorable outcomes through collaboration, education, and community.

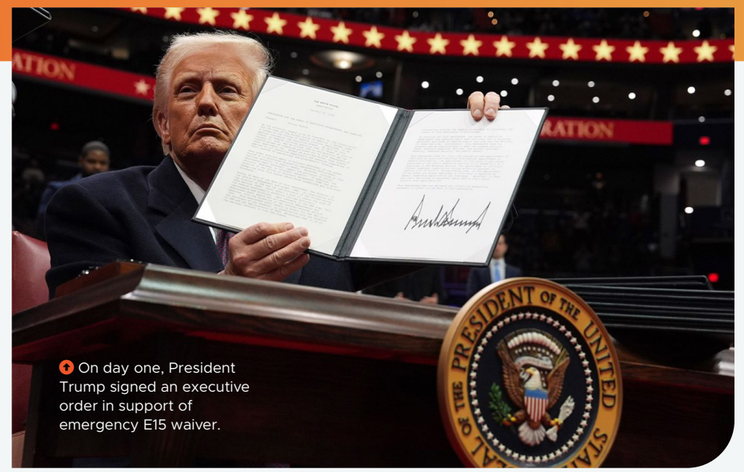

In 2025, Growth Energy influenced the policy landscape to create historic opportunities for biofuels, and we turned those opportunities into results.

The new Administration's focus on rural America generated momentum for policies that strengthen American energy security, lower fuel costs, and drive growth in the farm economy.

Growth Energy acted early, articulating a clear federal policy roadmap that showed how year-round E15, strong volumes under the Renewable Fuel Standard (RFS), an extended 45Z credit, and balanced trade relationships all aligned with Congress' and the newly elected president's agenda.

By planning ahead, shaping the discourse, and cultivating policymaker champions, our transformative advocacy secured a series of major wins for farmers, producers, and consumers.

On day one, President Trump signed an executive order in support of emergency E15 waiver.

Rep. Darin LaHood (R-Ill.) accepted a Fueling Growth award during Biofuels Summit.

DRIVING SUCCESS IN THE BELTWAY AND BEYOND

Biofuels started winning on day one, when one of President Trump's first Executive Orders directed the Environmental Protection Agency (EPA) to consider issuing emergency waivers for E15 to be sold in the summer months. The momentum built from there — a summer waiver arrived with minimal friction. Lawmakers reintroduced the Nationwide Consumer and Fuel Retailer Choice Act, and the bill — which would approve year-round E15 — racked up a record number of bipartisan cosponsors.

Growth Energy sustained a drumbeat of advocacy that included farmers, elected officials, and other stakeholders in support of this legislation. By combining targeted digital outreach, earned media, and grassroots activation, we ensured lawmakers started 2026 with a clear message: Rural America needs — and drivers around the country deserve — access to permanent, year-round E15 now. As a result of our efforts, bipartisan support is deeper, coalition coordination is broader, and public awareness is at an all-time high.

In May, we ran "Thank You" ads for the E15 waiver in several Midwest newspapers.

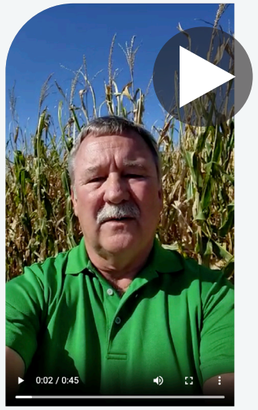

Biofuels Champion U.S. Sen. Deb Fischer (R-Neb.) spoke at the 2025 Biofuels Summit in Washington, D.C.

Mobilization and the Importance of Partnerships

In 2025 Growth Energy maintained a steady drumbeat of advocacy communications from multiple different groups of stakeholders to policymakers at all levels. By the end of the year, these efforts had resulted in pro-biofuel letters from 16 Senators, seven governors, 16 state attorneys general, and thousands of individual corn growers across the Midwest.

298 meetings facilitated with members and Congress

Growth Energy added a powerful tool to influence Capitol Hill. Members and industry stakeholders recorded short videos on what E15 means to them and their communities. These were sent directly to lawmakers in support of year-round E15.

From Capitol Hill to commuters' phones, **our E15 campaign met policymakers where they were —** and drove action.

Building Momentum on E15

In 2025 Growth Energy:

- Led advocacy efforts that helped secure a day-one executive order promoting nationwide, year-round E15 access.
- Worked closely with the Administration to ensure a timely summer E15 waiver.
- Drove bipartisan momentum behind the reintroduction of the Nationwide Consumer and Fuel Retailer Choice Act.
- Developed and executed a multi-channel advocacy effort to showcase the benefits of year-round E15.
- Helped introduce E15 incentives in Indiana, Kansas, and Ohio.
- Championed **E15 approval in California** after years of persistent advocacy.

Emily Skor joined a panel with FGS Global's Anthony Reed at National Clean Energy Week in Washington, D.C.

U.S. Reps. Tracey Mann (R-Kan.) and Nikki Budzinski (D-Ill.) accepted their Fueling Growth awards during Growth Energy's September Biofuels Summit.

Emily Skor signed NCGA's banner in support of year-round E15 at Commodity Classic.

Growth Energy Board Chair Tom Willis met with U.S. Rep. Tracey Mann (R-Kan.), USDA Secretary Brooke Rollins, and U.S. Sen. Roger Marshall (R-Kan.) in Kansas.

Deploying our allies for strategic touchpoints: Eric Brandstad and POET's Michael Walz advocated for E15 access at Mar-a-Lago.

Marquis Energy's Johan Ullman and Growth Energy's SVP of Regulatory Affairs Chris Bliley met with Sec. Rollins in London.

U.S. Sen. Amy Klobuchar (D-Minn.) accepted a Fueling Growth award during the Biofuels Summit.

Growth Energy members paused on the East front of the U.S. Capitol Building.

Following **California's E15 approval,** we immediately launched thank-you advertising to reinforce positive momentum — **generating over 100 messages from advocates to lawmakers.**

E15 Savings Nationwide in 2025

- 80¢ Ohio — Feb. 12, 2025
- 20¢ N.C. — Jan. 20, 2025
- 20¢ Minn. — Nov. 12, 2025
- $1.07 Mich. — July. 3, 2025
- 32¢ Iowa — Apr. 20, 2025
- 15¢ Ill. — May 20, 2025
- 20¢ Wis. — Jun. 6, 2025
- 30¢ Penn. — Nov 12, 2025

Affordability was the cornerstone of our E15 messaging in 2025.

Senate Majority Leader John Thune (R-S.D.) and Emily Skor discussed key industry policy priorities in Washington, D.C.

Extending and Enhancing the 45Z Clean Fuel Credit

In 2022, our industry celebrated passage of the 45Z Clean Fuel Production Credit as part of Democrats' signature legislation. But with a new administration and new Congressional leadership at the helm, Growth Energy redoubled efforts to showcase how a longer timeline would spur billions in innovation and rural development.

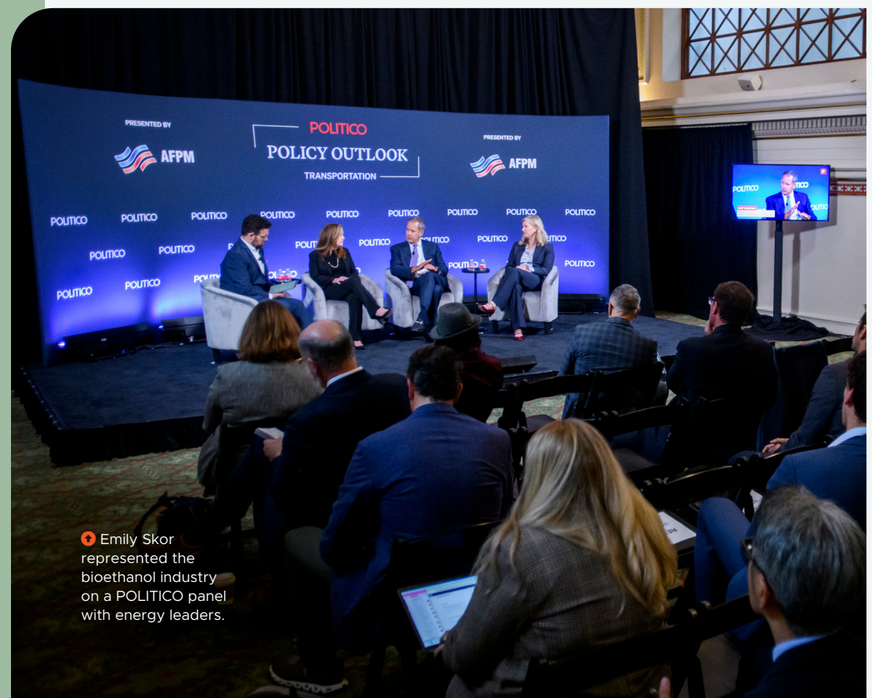

In 2025 we:

- Pressed U.S. Treasury and IRS to finalize guidance for implementation of 45Z.
- Secured an extension of the 45Z Clean Fuel Credit to strengthen long-term market certainty.
- Advocated for clarity around farmers' investments in sustainable practices.

"An extension of 45Z will unlock billions of dollars in new investments across rural America, supporting strong, stable markets for America's farmers and positioning American biofuel producers to compete in global fuel markets."

— Emily Skor after the One Big Beautiful Bill Act extended 45Z.

Emily Skor represented the bioethanol industry on a POLITICO panel with energy leaders.

"Growth Energy marked the **20th anniversary of the Renewable Fuel Standard** by amplifying its impact on America's economy and energy future."

We promoted key aspects of the RFS, specifically that it:

- Creates tens of thousands of jobs,
- Keeps billions of dollars in Americans' pockets,
- Reduces emissions, and
- Boosts American energy dominance.

12K
reached by press release in support of EPA's RVO proposal

Renewable Fuel Standard RVOs

Even as we opened new markets, Growth Energy fought to strengthen the bedrock of biofuel demand: the RFS. In June, after close communication with Growth Energy and our members, EPA proposed record-high Renewable Volume Obligations (RVOs) for 2026–2027.

Growth Energy led the charge to support these ambitious volumes — and to ensure that every mandated gallon made it to the market without the abuse of small refinery exemptions. Since the proposal, we have rallied our members and allies to submit comments and provide expert analysis to EPA to continue the push to finalize EPA's proposal.

"If the EPA follows through on its proposal to expand biofuel production under the RFS, those benefits will only grow."

— Midwest farmer amplified the benefits of the RFS for an industry-produced radio spot.

Ads were distributed to 1,200 stations across six states.

DEEP EXPERTISE

Leveraging key insights and providing strategic leadership to advance the industry.

Growth Energy's policy and technical teams shaped the discourse in 2025, putting unrivaled subject-matter expertise and strategic analysis to work for our members.

We submitted dozens of data-driven comment letters and conducted briefings with policymakers at EPA, the U.S. Department of Agriculture (USDA), the U.S. Department of the Treasury, and other agencies.

We testified on Capitol Hill; made persuasive arguments in court cases, and continued to broaden the reach of our thought leadership in Washington and beyond. These efforts were recognized and amplified in local, regional, and national press, as well as at conferences across the country and around the world. When lawmakers, decision-makers, reporters, or the public need research, data, or insight into the future of biofuels and agriculture, they turn to Growth Energy for its deep expertise.

By year's end, Growth Energy cemented our status as the go-to expert on renewable fuels — we delivered the knowledge policymakers need, defended the RFS in the courts, fought for fair competition for U.S. biofuels in global markets, kept members engaged, provided technical expertise, supplied clear, reliable data, and amplified our narrative on the world stage.

Journalists regularly cited our data and quotes in national media. Wherever bioeconomy strategy was discussed, our analysts set the agenda — reinforcing that this industry's knowledge center is Growth Energy. In every sense, our deep expertise paid off: smarter policy, bigger markets, and stronger returns for our members.

We continued to work with global standards organizations to ensure industry compatibility.

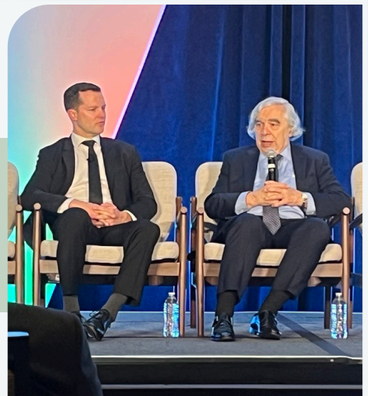

Delivering the Knowledge Policymakers Need

In December, Chris Bliley, Lincolnway Energy Chairman Jeff Taylor, and The Andersons Senior Vice President Mark Hobrock participated in a panel discussion on year-round E15.

U.S. Grains and Bioproducts Council President and CEO Ryan Legrand and former Secretary of Energy Ernie Moniz spoke before an audience of global bioethanol industry representatives. Moniz and the Energy Futures Initiative Foundation continue to promote its ethanol decarbonization roadmap, which highlights low-carbon fuels' importance in the energy transition

Early in 2025, Emily Skor met with incoming EPA Administrator Lee Zeldin to preview Growth Energy priorities.

The proposal with "the highest volumes ever," would **"truly unleash American energy dominance."**

— Emily Skor during testimony before a virtual EPA hearing on the 2026-2027 proposed RVOs.

"The world is facing a multi-billion-liter challenge, and it needs a multi-billion-liter solution. **That's what our members can provide."**

— Emily Skor during a keynote address at the World Ethanol & Biofuels Conference in Brussels.

Growth Energy's General Counsel Joe Kakesh spoke to an audience of international executives in Houston.

Chris Bliley spoke at the Fuel Ethanol Workshop in Omaha.

CHAMPIONING BIOFUELS IN THE COURTS

In 2025, Growth Energy continued to leverage its litigation expertise to ensure that biofuels remain a vital player in our nation's transportation sector. We pushed back against demand destruction, ensured RFS program integrity, and challenged attempts to box out biofuels from a lower carbon future.

Below is just a selection of the cases Growth was involved in.

Clean Fuels Alliance America, et al. v EPA (D.C. Cir.)
2020 RVO/SRE "makeup" rule

Center for Biological Diversity v. EPA (D.C. Cir.)
RFS Set 1

Clean Fuels Alliance Am., et al v. EPA (D.D.C.)
2026 RVO deadline

Calumet Shreveport v. EPA (D.C. Cir.)
April/June 2022 SREs

EPA v. Calumet Shreveport (S. Ct.)
April/June 2022 SREs

Wynnewood v. EPA (D.C. Cir.)
July 2023 SREs

REH Company, LLC v. EPA (D.C. Cir.)
August/November 2025 SREs

Growth Energy v. CARB (Cal. Sup. Ct.)
California LCFS amendments

Growth Energy staff members paused along a cornfield near Council Bluffs, Iowa, and during a tour of ADM's bioethanol processing facility in Columbus, Neb.

Plant Manager Ben Parsley provided a tour of the SIRE production facility in Council Bluffs, Iowa.

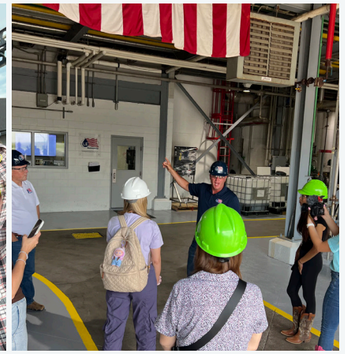

Farmer Tim Couser allowed a young visitor to take the controls during harvest in Nevada, Iowa.

Plant officials demonstrated the bioethanol production process for social media influencers.

MARKET ADVANCEMENT

Driving adoption, boosting demand, and positioning biofuels for long-term success.

Whether at home in the U.S. or overseas, Growth Energy's commitment to expanding and opening new markets continued in 2025.

We strengthened strategic partnerships with fuel retailers and achieved record growth in biofuel availability across retail sites and terminals.

Each new station, retail partner, and terminal supplier translated directly into increased bioethanol sales. To date, Growth Energy has helped more than 4,700 retail sites add higher blends such as E15 and E85 — with 2025 marking a record year as more than 900 new sites came online.

In 2025, we also drove higher E15 volumes at existing locations through innovative marketing strategies, including the introduction of E15 premium, optimized pump configurations, retailer in-app promotions, and targeted paid campaigns that reached consumers where purchasing decisions are made.

900
new retail locations added setting a new record for site growth

3
new markets launched for E15: Phoenix, St. Louis, and Seattle

26
states engaged with regulators to expand E15 availability

42%
increase in E15 terminal supply, adding 150 new suppliers

Today, consumers can find E15 at more than 4,700 retail locations nationwide.

Growth Energy's market development team worked to introduce E15 at a Costco in Nebraska. Staff participated with Meijer in their promotion of E15 availability at a retail location in Michigan.

Securing markets for bioethanol products at home and abroad

Growth Energy's engagement abroad reached new heights in 2025. We aggressively engaged in international trade policy, including filing formal comments to the Office of the U.S. Trade Representative (USTR) and other bodies on critical issues, ranging from U.S.-Mexico-Canada Agreement (USMCA) review to Section 301 investigation into Brazil's unfair trade practices.

In our comments to USTR on its USMCA review, we are seeking to ensure free and fair trade with Canada, our largest trading partner, and expand new access to Mexico for higher bioethanol blends. And in Brazil, we set the record straight on long-standing unfair practices from tariffs to meaningful participation in Brazil's biofuels policies to highlighting how unsustainable agriculture practices are hurting U.S. farmers in export markets. Voicing the concerns of American farmers in trade cases such as these helps push for a more level playing field in global fuel markets — one that will continue to pay dividends in 2026 and the years to come.

2 billion+
gallons of global exports, forecasted to set another annual record in 2025

24
global missions, meetings, and reverse trade missions conducted or planned across six continents — a 54% increase from 2024

21
formal letters and comments submitted by Growth Energy on trade policy and administration actions

11
industry-wide submissions coordinated with partners, including 10 with USGBC

Emily Skor and Chris Bliley paused outside the U.S. mission building in Brussels.

Expanding global markets and winning at trade

In 2025, Growth Energy:

- Enhanced U.S. ability to compete through free trade and regulations grounded in sound science.
- Rallied support for trade deals with the EU, Indonesia, Japan, the UK, and Vietnam that would open new markets for American biofuels.
- Regularly interfaced with USTR and USDA Foreign Service Officers to ensure bioethanol remains top of mind in advocacy.
- Testified at USTR's hearing on Brazil's Section 301 investigation calling for swift action against Brazil's unfair trade practices.

Growth Energy board members met with U.S. Trade Representative Jamieson Greer.

CONSUMER ENGAGEMENT

Connecting with drivers and translating benefits into everyday choices.

Growth Energy met consumers with award-winning creative, strategic partnerships, and targeted activations to elevate awareness of higher biofuel blends — increasing favorable perceptions of these fuel options.

Fueling a Movement with Consumers

Growth Energy led the industry in consumer engagement, driving reach and proven impact through a bold, multi-channel campaign focused on elevating the benefits of higher biofuel blends.

From NASCAR race weekend activations to always-on social, influencer, and video engagement, the association met consumers where they are and sparked meaningful awareness and conversation.

5 MM+
impressions to mom and millennial audiences

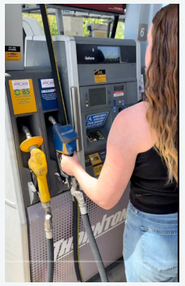

156%
increase in positive biofuel sentiment

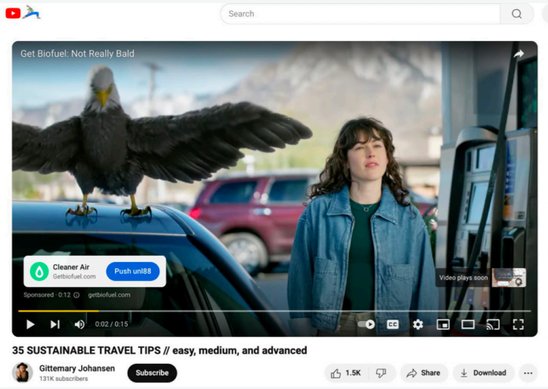

8,000+
key influencer engagements

GET BIOFUEL®

By extending its award-winning Nature Will Thank You creative into new markets, Growth Energy translated complex energy concepts into clear, consumer-relevant benefits including lower fuel costs, reduced emissions, and support for American farmers, reinforcing its leadership in building momentum for higher blends.

Emily Skor and representatives from Growth Energy member John Deere at the Iowa 350 race in July.

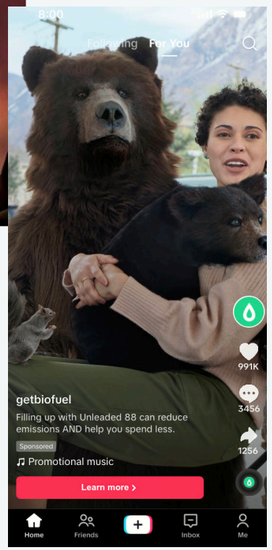

At the track with NASCAR and Austin Dillon's No. 3 car, Growth Energy partnered with member John Deere to spotlight the consumer and rural benefits of higher biofuel blends.

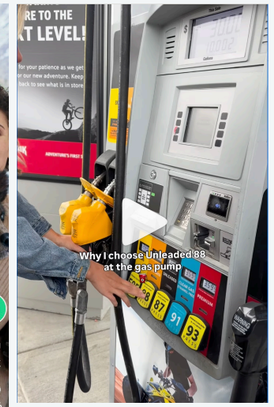

Online, Austin promoted E15 in a series of videos posted to Growth Energy social media accounts.

Growth Energy's VP of Communications and Public Affairs Elizabeth Funderburk (center) accepts a Drum Award with agency partners at a New York City ceremony, where Growth Energy's Get Biofuel campaign earned top honors for excellence in marketing and communications

A bold consumer campaign leveraging NASCAR, social media, and influencers drove awareness of E15 and its impact on the farm economy.

I'll have to look for this when I fill up!

eveandsol 3w
We have a dodge grand caravan that uses e15, I notice a huge difference when we use that vs regular unleaded gas!

iliketotalkblog 2w
Yes to less emissions and cleaner air!

Our Membership

Throughout the year, we brought industry together. We hosted top-tier events, convened critical gatherings, hosted insider briefings, and created a constant stream of opportunities for members to collaborate, network, and learn together.

Our outreach didn't stop there, we crisscrossed the country and the globe taking our message to other strategic events like Commodity Classic, NAFB Trade Talk, USGBC Global Ethanol Summit, and beyond.

Growth Energy created the conditions for new relationships to take hold and new business opportunities to blossom in a way that moved the entire biofuels industry forward in 2025.

Bringing Together Industry Allies

We provided a game plan for the new vision in Washington at our Executive Leadership Conference and a path for pushing ahead at our Biofuels Summit.

ABOUT GROWTH ENERGY

Growth Energy is the leading voice of America's biofuel industry. Our members operate and support biomanufacturing facilities at the heart of America's bioeconomy, delivering a new generation of clean fuel options.

GETTING THE MOST OUT OF YOUR MEMBERSHIP

- **Leverage Growth Energy's Expertise:** Tap into the industry's leading organization for advocacy, technical insights, and stakeholder education to strengthen your impact.
- **Make Your Voice Heard:** Provide input on key issues shaping the future of the biofuel industry and collaborate on solutions.
- **Engage in Member-Only Resources:** Join exclusive issue updates and webinars to stay actively involved and informed on pressing topics.
- **Participate in Exclusive Events:** Attend premier events like the Biofuels Summit and Executive Leadership Conference to connect with industry leaders.
- **Expand Your Network:** Build meaningful relationships with peers and stakeholders through year-round networking opportunities.
- **Stay Informed:** Receive daily updates on critical industry developments.
- **Utilize the Member Portal:** Access valuable resources, tools, and information available on the Growth Energy website's member portal.

JOIN Growth Energy®

Growth Energy is the leading voice of America's biofuel industry, delivering a new generation of clean fuel options.
